# DESIR LLOYD BARRY JOHANSON

Computer Engineering Student | Web Development & Artificial Intelligence
gintik002@gmail.com

## PROFILE

Computer engineering student at ESIH with a genuine passion for programming and emerging technologies, especially artificial intelligence. I've already put my skills to the test in a real professional setting as a network administrator. I'm curious, detail-oriented, and always learning — I'm looking to contribute to meaningful projects where I can grow and make a real impact.

## EDUCATION

**Computer Engineering** — In progress
*École Supérieure d'Infotronique d'Haïti (ESIH)*

**High School Diploma** — Completed
*Collège Catts Pressoir*

## WORK EXPERIENCE

**Network Administrator** — 1 year | Private Company

- Day-to-day management and maintenance of the company's network infrastructure.
- Diagnosing and resolving network issues to keep operations running smoothly.
- First-level technical support for internal users.
- Monitoring network security and applying necessary updates.

## TECHNICAL SKILLS

**Languages & Web Development**

- HTML, CSS — Structured, responsive web page design.
- JavaScript — Dynamic interfaces and client-side interactions.
- PHP — Back-end development and form/database handling.
- Python — Scripting, automation, and machine learning basics.
- SQL — Querying, managing, and manipulating relational databases.

**Frameworks & Libraries**

- React.js — Reactive UIs with state management and reusable components.
- Next.js — Full-stack apps with SSR and static site generation.
- Vue.js — Progressive, reactive interfaces based on the MVVM pattern.
- Angular — Robust, scalable apps with a component-driven architecture.
- Tailwind CSS — Fast, responsive styling with a utility-first approach.

**Artificial Intelligence & Prompt Engineering**

- Designing and optimizing prompts for large language models (LLMs).
- Strong interest in practical AI applications in local contexts.

**Systems & Infrastructure**

- Windows — Advanced use and workstation administration.
- Windows Server — Basic server configuration and management.

- Network Administration — Equipment configuration, troubleshooting, and maintenance.

**Office Tools**

- Microsoft Word & Excel — Professional document writing and data management.

## LANGUAGES

- French — Advanced (reading, writing, speaking)
- English — Intermediate (functional understanding and communication)

## INTERESTS

- Tech Watch — Keeping up with the latest in AI and software development.
- Personal Coding — Exploring new languages, frameworks, and tools on my own time.
- Problem Solving — Working through logic and algorithm challenges to sharpen technical thinking.
